The ultimate in UPS monitoring and management for the SG & MLI Series UPS

UPSilon 2000 & UNIX

UPSilon 2000 takes UPS management and monitoring into the new millennium with advanced features like TCP/IP based remote monitoring, abnormal status notification via e-mail or pager and multi-language expansion support. UPSilon 2000 also includes all of the standard monitoring, control, data logging and history features expected in today's advanced UPS software.

With UPSilon 2000, interfacing the SG & MLI Series UPS to your computer is as simple as connecting a cable to any unused serial port and executing the setup command. Everything else is done for you. Should you need assistance, help is only a mouse click away with on-line help being provided directly over the Internet.

- Automatically saves files
- Orderly O/S shutdown
- TCP/IP based email messaging
- Automatic paging
- Multi-language support
- Data & history print outs
- Scheduled start-up/shutdown
- TCP/IP remote UPS monitoring
- Diagnostic UPS self-test
- Defective battery notification
- Power quality data log
- Multiple graphical displays
- Full 32 bit application
- Programmable warning messages
- On-line help
- UPS temperature monitoring
